Company Notes:

It's fitting that a company dedicated to the culinary arts was born at the Filberg Festival, an annual celebration of artists, artisans and great food in the Comox Valley on Vancouver Island. The creative sparks for Artisan Edibles flew when Judy McArthur and Maureen Drew discovered their shared passions for gourmet food, design and small business at Filberg. Within six months, they formed a partnership and developed a business plan to introduce their own commercial product line under the Artisan Edibles label.

Chipotle Chinook Gourmet Sauce - SpicyThis - Year Round

SpicyThis is our original recipe. It's a unique flavour that we have tweaked over the years. It originates from Mexico City. This is considered a condiment like sauce. When you taste it, it welcomes you with a sweet note, followed by warm heat slightly smokey that has a delayed type effect. It is a very versatile product to be consumer hot or my preference cold, over hot food. Our product has not powders, nor preservatives and has been rated gluten free. We can offer 4L food service jugs all year. Available as well in 350 mL glass bottles.

Chipotle Chinook Gourmet Sauce - MildThis - Year Round

MildThis flavour of our sauce has half the weighted formula of the Chipotle in Adobo. It subjectively come across slightly sweeter. We called it mild for those that like some heat in their food. It is not a boring mild. We also carry this in 4L food service jugs all year. Available as well in 350 mL glass bottles.

Company Notes:

Two of our challenges in life were how to live lightly on this beautiful blue planet and how to do something worthwhile. Shellfish aquaculture has enabled us to meet these challenges. We have refined our farming methods to be compatible with the environment. We maintain genetic diversity by collecting wild seed, and the oyster rafts act as nursery reefs for a wide range of fish, algae, and invertebrates.

Our oysters and clams feed only on naturally-occurring marine plankton. No chemicals, pesticides, or colouring agents are used in the growing of our shellfish. The blend of growing healthy, top-quality shellfish and living the outdoor marine lifestyle is one we truly enjoy. Our commitment is to provide premium-quality shellfish for your enjoyment; and to do so in a manner that allows future generations the same opportunity.

Products Available:

Ancient Roman Spelt Bread - Year Round

Spelt is an ancient grain that traces its heritage back long before many wheat hybrids. It offers a broader spectrum of nutrients compared to many of its more inbred cousins in the wheat family. It is an excellent source of Vitamin B2 and a good source of niacin, thiamin, and copper. This particular combination of nutrients makes spelt bread an excellent choice for people suffering from migraine headaches, atherosclerosis, or diabetes. Ingredients are: spelt flour, spelt bacterial culture, sea salt, and sunflower oil. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

Baltic Bread - Year Round

There are more than 40 different varieties of delicious breads in Latvia, with Baltic being the most popular one. It's a denser bread than Borodin due to special enzymes and the unique process involving in baking it. Baltic bread has a very distinct, almost sweet flavour as it's made with caramel and caraway seeds. Ingredients: dark rye flour, whole wheat flour, molasses, caraway, caramel, malt, bacterial culture, sea salt, and filtered water. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

100% Barley Bread - Year Round

Barley played an important role in the ancient Greek culture as a staple bread-making grain. It was an important food for athletes, who attributed much of their strength to their barley-rich training diets. Roman athletes continued this tradition of honouring barley for the strength that it gave them. Barley's claim to nutritional fame is based on its being a very good source of fiber and selenium, as well as a good source of phosphorus, copper, and manganese. Ingredients: barley flour, barley bran, bacterial culture, sea salt, and filtered water. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

Buckwheat Bread - Year Round

Buckwheat is a fruit seed related to rhubarb. This makes it a suitable substitute for grains and a great alternative for wheat or other grains that contain protein glutens. Diets that contain buckwheat have been linked to lowered cholesterol and lowered blood pressure. Buckwheat also contains magnesium, which relaxes blood vessels, improving blood flow and nutrient delivery. Ingredients: buckwheat, flax, rice flour, sea salt, baking powder, and xanthan gum. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

Euro Flax Bread - Year Round

Its high content of alpha linolenic acids has made the ancient flax seed become a modern miracle food. Alpha linolenic acid is a type of omega 3 fatty acid, similar to those found in fish such as salmon. Benefits of flax seed include lowering cholesterol and blood pressure. Ingredients: whole wheat flour, flax seeds, ground flax, sea salt, fresh yeast, and filtered water. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

Pharoah's Kamut Bread - Year Round

Kamut grain is an ancient relative of durum wheat, twice the size of common wheat, with 20 to 40% more protein and higher lipids, amino acids, vitamins, and minerals. It's a delicious, sweet alternative for all products that now use common wheat. Ingredients: kamut flour, bacterial culture, sea salt, and sunflower oil. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

Russian Rye Bread - Year Round

Russian Rye, also known as Orlov bread, is one of the most famous breads from 18th century Russia. It is named after Count Orlov, military officer and lover of Catherine the Great, empress of Russia from 1762 to 1796. He organized the coup d'etat that placed Catherine on the Russian throne and subsequently was her close adviser. Ingredients: dark rye flour, whole wheat, sea salt, bacterial culture, sunflower oil, and filtered water. All European Breads products are made by hand, using artisan methods and original recipes. Packaged in a biodegradable bag!

Georgian Baguette - Year Round

Georgian Baguette is one of the oldest breads in the world and originates from the land of Colchis (present day Georgia). According to Greek mythology, Colchis was a beautiful land situated on the mysterious periphery of the heroic world. Here in the sacred grove of the war god, Ares, King Aetes hung the Golden Fleece until it was seized by Jason and the Argonauts. Ingredients: organic white flour, sea salt, yeast, lemon juice, and filtered water. All European Breads products are made by hand, using artisan methods and original recipes.

Each recipe was created by myself, Donna Denison, and includes fresh and natural ingredients as well as some organic products.

All of the vinegars used in the dressings are made at Little Creek using my own formulas. Company Notes:

Gort's Gouda Cheese Farm is a family-owned and operated company . We have been in business for over twenty years. Our specialty cheeses are made right on the farm. Our Gouda, Yogurt, Quark and Feta Cheeses are made from locally-produced milk. Our newest line of cheese is the Maasdammer, produced from our own small herd of grass fed milking Shorthorns and Brown Swiss. Please see our website for more information.

Products Available:

Maasdammer Cheese - Mild, Medium, Aged and Spiced - Year Round

A Swiss-style cheese with semi-firm texture and large eye formation. The Maasdammer has a slightly sweet and nutty flavour. The cheese is made with our own unpasteurized cows' milk. The cows graze on grass and are fed our own special blend of feed that is blended and ground on our farm. Maasdammer is made in 8 kg wheels. No preservatives or artificial flavours are used in the producing of this cheese. Maasdammer is an excellent cheese to use in sandwiches, fondues, cheese sauces and soups. It is available in mild, medium and aged flavours. The Maasdammer is produced in small batches to ensure quality.

Bulgarian Yogurt and Quark - Year Round

This increasingly popular yogurt can be eaten plain, with granola, or blended with liquid honey and some fresh Okanagan berries to serve as a tasty fruit smoothie! Made the old-fashioned way, the yogurt is hung in cloth bags to thicken, and no preservatives or thickening agents are added. The milk fat content of the regular yogurt is 7%. Quark has ½ the fat of regular cream cheese, and can be used in cheesecakes, as a spread with spices or jams, or blended with fresh fruit. Quark has a milk fat content of 12%, and has been around - according to scripts from ancient Greece, China, Rome and Middle Eastern countries - for centuries as a nutritional food item. It is also available in low fat.

Cow Feta Cheese - Year Round

Available in plain, oregano/tomato/garlic, and tomato/basil. Feta is a classic curd cheese whose tradition dates back thousands of years. Feta is a staple, crumbled in Greek salad; but don't stop there. It is a great addition to any salad or pasta dish, or try it on pizza! Traditionally, feta was made from goat or sheep's milk. Our feta is made from cows' milk, giving it a slightly milder flavour. Our feta comes in approximately 200 g pieces and is vacuum packed. If you prefer some more flavour, try the spiced feta available in basil & tomato or tomato, garlic & oregano flavours.

Gouda Cheese - Mild, Medium and Aged - Year Round

If you are looking for some good old-fashioned plain gouda, there are three choices. All of them are creamy, well textured, and range from a mild gouda flavor to the distinct, hearty taste of our award-winning Aged. The Mild Gouda is about two months old and is perfect if you are looking for a lighter-tasting cheese. Our Medium is four to six months old, giving it a little bit stronger taste than the Mild. Both the Mild and Medium are also available in the traditional Dutch Style which means a coating is applied by hand to give the Gouda a harder rind, in turn giving the cheese a slightly nuttier flavor. Alas, the Aged Gouda. Receiving first place at the Canadian Cheese Grand Prix in 2004, we can barely keep this one on the shelf! Aged for at least one year or more, this cheese has an extremely creamy texture and rich flavor. It melts in your mouth!

Gouda Cheese - Light, Spiced and Smoked - Year Round

If you think a cheese with a lower fat content would be dry and without flavour, think again! Our light-style Gouda is moist and surprisingly flavourful. With a milk fat content of 17% (while our other cheeses are 33%), our Light Gouda sells remarkably well. A light/low salt Gouda is also available in our store. With our Spiced Gouda, there are 13 flavours to choose from; including red pepper, peppercorn, parsley, Italian, Greek, jalapeno habenero, habenero, and cumin. If you like that "smoky" taste, here's your cheese: our smoked-flavoured Gouda remains a popular choice with its creamy texture. Look for it in its black, waxed coating.

Fromage a la CrÃ¢me (MF/MG 22% - MOIST/HUM 64%). A light-lemony-spreadable cheese, which lends itself to a chefâ€™s creativity. Blended with savoury or sweet ingredients, this deep-yellow, fresh cheese offers staff a unique alternative to standard cream cheeses as well as being an interesting substitute for Ricotta. Although served fresh is best, this is one cheese that freezes well, allowing for good inventory and cost control. This product can be shipped in various size-formats (ie. 250 g, 500 g tubs and 1kg cryovac).

Red Dawn Cheese - Year Round

Red Dawn (MF/MG 31% - MOIST/HUM 39%) - A French-inspired tomme or loaf of cheese, the rind of which has been gently washed/massaged for up to thirty days in Vancouver Island ales and ciders. The intended purpose is to encourage the breakdown and ripening of the cheese from the rind towards the center. A light but distinct pungency develops, enhancing the buttery, creamy nature of the cheese. The rind of Red Dawn has a warm orange hue. This product comes in two (2) formats, 600 g and 2.2 kg.

St. Clair Cheese - Year Round

St. Clair (MF/MG 25% - MOIST/HUM 50%) - Our velvety version of a â€œCamembert-styleâ€• cheese. Whoops â€“ did we call this â€œCamembertâ€•? Unless we produce the cheese in Normandy France from raw milk from the Norman cows, following strict adherence to controlled specifications, use of the word â€œCamembertâ€• is verboten. So we didnâ€™t; ours is St. Clair â€“ a West Coast inspiration with a nutty flavour and a wonderful white rind bloom with hints of a mushroom-like aroma. For presentation, we offer the food service industry a multitude of shapes â€“ from the small button or thimble-shaped cheese, through to Valencay shape, as well as traditionally-shaped cheeses. In most cases at the beginning of the ageing process we cut the cheeses in half â€“ allowing for better portion control and the ability to showcase various cheeses, while living within budget constraints.

Belle Ann Cheese - Year Round

Belle Ann (MF/MG 31% - MOIST/HUM 39%) - A French-inspired tomme or loaf of cheese, the rind of which has been gently washed/massaged for up to thirty days in Vancouver Island blackberry port. The intended purpose is to encourage the breakdown and ripening of the cheese from the rind towards the center. A light but distinct pungency develops with a striking contrast of the blue/grey rind against the white pate of the cheese. This product comes in two (2) formats, 600 g and 2.2 kg.

Goat Cheddar Portions - Year Round

Goat Cheddar Portions enveloped in black cheese wax (MF/MG 31% - MOIST/HUM 39%) - A brilliant white version of the centuries-old recipe, packaged in a format ideally suited for the restaurateur who wishes to give a guest a portion of cheese without challenging storage issues. Each portion is approximately 40 grams in weight and coated with black cheese wax, making for an elegant and contrasting presentation on any cheese platter. Larger formats of waxed and unwaxed portions are also available from 250 g to multiple kilogram weights.

Chevre Cream Cheese -

Chevre (MF/MG 22% - MOIST/HUM 64%) - A striking white cream cheese, unique in its flavour. Served fresh and stored frozen, this cheese gives a chef a high degree of versatility for menus calling for goat cheese "and yet it is considerably economical in value. Formats range from 250 g to 1 kg cryovac.

Feta Cheese - Year Round

Feta (MF/MG 22% - MOIST/HUM 55%) - Following a recipe passed down from a master cheese maker has enabled the creation of a feta that rivals Old World versions "yet is fresh and zesty here on the West Coast. Delivered in multiple size formats "cryovac or delivered in whey brine.

St. Michel Cheese - Year Round

St. Michel (MF/MG 25% - MOIST/HUM 50%) - A goat version of our St. Clair; that's the one we cannot call "Camembert." Though with a different name, it has the same delectable qualities attributed to St. Clair "rich in creamy texture, nutty, mushroom-like rind "with a flavourful goat pungency.

Special Orders -

We welcome input from chefs as we strive to produce a cheese unique to an individual's specification.

Dairy (Cow) Milk - Varieties - Year Round

Our milk comes from a Vancouver Island farm, where the family believes passionately in allowing its herd to graze upon the natural grasslands surrounding its farm from spring until fall. This ensures higher levels of omega-3 fatty acids, vitamin E and higher concentrations of conjugated linoleic acid. See "Meet Jo Robinson" at the www.eatwild.com website.

Goat Milk Varieties - Year Round

Our Goat's Milk arrived on the island from Abbotsford - where the animals are cared for by an award-winning farmer and a leading authority on the North American Goat Industry. The farm is "transitional organic" meaning they are currently undergoing the accreditation process necessary to guarantee the organic nature of their farming practices. Due to the meticulous feeding practices at the farm there is a distinct mild flavour to all the cheeses we produce. Cooking with our goat cheeses enhances the pungency - but not too overpoweringly.

Federally inspected Premium Vancouver Island lamb, born and raised on my farm. These lambs are fed only milk, hay, grass and a limited amount of grain to balance their nutrition and to maintain health. No medications are used beyond those necessary to insure the health and well being of the animal. Should a lamb require health interventions such as antibiotics, strict protocols are maintained and these animals are not sold as prime lamb. Holly Hill Farm has been raising lamb on Vancouver Island for over 35 years and has recently moved to a new 28 acre farm in South Cedar, BC (just south of Nanaimo).

Our lamb is uniquely tender, juicy and mildly flavored because the animals are processed at peak finish with a balance of fat, lean and bone between the ages of 12 and 16 weeks. Holly Hill Farm is currently following the guidelines laid out by the Canadian Sheep Federation "On Farm Food Safety Program" and will be seeking certification under this program as soon as it becomes economically possible in BC.

Lamb - Year Round

Freezer Lamb My predominantly Polled Dorset ewes lamb naturally lamb year round so the meat you buy in March will have the same flavor profile and excellent eating characteristics as the lamb you buy in Oct. Dorset ewes are excellent mothers who are heavy milkers (they are a very old breed historically used as "milk sheep") and the lambs grow very quickly. By selecting for good mothering, out of season lambing, and large mature body size I have insured the lambs will grow quickly without growth enhancers on a minimum of grain. At peak finish lambs average 55 to 70 lbs hanging weight. They are available wholesale as full or ½ carcasses or can be cut and wrapped into retail cuts of your choice for an additional cost.

Products Available:

Hopcott Beef - Year Round

Naturally Raised -No added hormones, steroids or antibiotics. Grass forage fed while on the ranches & finished on a high roughage diet of a mixture of our own grass & corn silage, along with limited amounts of high quality grain. We believe in humane animal management and animal welfare is a top priority. - Local -The animals are born on 1 of 3 ranches, which we visit on a regular basis, and spend the first half of their lives roaming the land. The Anderson Family at Kane Lake Ranch in Lumby, BC The Pincott Family at Pincott Ranch in 100 Mile House, BC The Andrews Family at Big Smokey Ranch in Merrit, BC. They then spend the next half of their lives on our farm, right next door to the store, where we have full quality control. - Quality & Taste -We use the traditional method of aging our AAA Grade beef by hanging it on the rail and dry aging it for 28 days, as opposed to more common wet aging in cryovac bags. Dry aging allows the natural enzymes to slowly tenderize the meat & evaporate the moisture to create a more concentrated & enhanced depth of flavour. For this reason, we do not need to needle our beef. - Selection -We are a full custom butcher shop that handle the entire animal. We also have fully trained butchers who specialize in the breaking down and cutting of complete animal carcasses. For these reasons, we are able to offer our customers a vast array of beef cuts. Know your butcher. Know your food. See here for a list <http://www.hopcottmeats.ca/Beef>

Hopcott Chicken - Year Round

Our chicken comes from high quality birds grown by local poultry farmers within the Fraser Valley. Our birds are free run and are raised on a wheat based diet. Free run means the birds are given the freedom to wander around an enclosed barn. Our chicken is raised without added growth hormones, as per Canadian regulations. They are not fed antibiotics and are HACCP certified. <http://www.hopcottmeats.ca/Poultry>

Hopcott Pork - Year Round

We heavily support Johnstons. The pigs are raised without hormones and are grain fed a tasty blend of wheat, barley and corn. Their primary protein sources include canola and soybean meal, and they are given lots of room to grow. Sow and piglets diets have added fats to increase energy level and plenty of vitamins and minerals are added to the pigs diet, to ensure healthy and strong animals. Human handling practices and animal welfare are extremely important in the production of high quality pork, and Johnston's is no exception. <http://www.hopcottmeats.ca/Pork>

Hopcott Deli and Sausages - Year Round

Our customers rely on us to feed their families. Mothers are proud to send their children to school with a sandwich stuffed with Hopcott meats or serve up a platter of assorted sausages at a Sunday BBQ. Breakfast just isn't the same without our bacon, and you'll never snack on another brand once you try our beef jerky. After all, all natural meats just taste better!<http://www.hopcottmeats.ca/Deli>

Company Notes:

J. Beethoven's Corned Beef often gets compared to that which is offered at the Carnegie Deli in New York and Schwartz's in Montreal. I am a native New Yorker. My product is strictly hands on, non injected, tender and flavourful. The briskets are cured in barrels and turned every few days for a two-week period before they are cooked.

Products Available:

J. Beethoven's Corned Beef - Year Round

Corned beef brisket, fully cooked, that is sold to various restaurants and hotels in the Vancouver area. It is an artisan, hands-on product that sits in a brine for two full weeks before being steamed in a baker's oven. I use only Alberta beef and a generous amount of whole pickling spice. I do not inject my product and cook it to the proper point of tenderness so that it is not rubbery, but falls apart as brisket should.

We want to create awareness, not only in the producing countries but also in the markets that we penetrate. Our first product is truly unique because of its origin and the hands that cultivate it. We pride ourselves on striving for perfection, balance and making a real difference in everything that we do. This coffee is hand picked, sun dried and bird friendly. It is grown under shade, and it is exported and imported by Latin Organics. It is roasted to perfection in small batches and delivered as it is being ordered. We have paid detailed attention to our packaging design/content and quality control of our product. This first product is the pioneer that will set the terrain so that Latin Organics may continue to bring other exceptional products. We choose to work with those that are at the highest risk of losing their livelihood or traditions.

Coastal Peak Roasted Coffee - Year Round

An invitation to reconnect with your roots - a spiritual connect. 100% Colombian, Fair Trade, Organic Roasted Coffee coming direct from its country of origin. This first product offers a unique cup of spiritual arabica beans that have been blessed by the indigenous farmers that cultivate the coffee: the "richest and mildest, divine, superb" coffee as described by those who have had the chance to try it. This Medium Roast offers the chance for coffee lovers to make a cup of espresso without having to darken the roast or ruin its character by blending other beans ... unique quality - or just drinking the coffee as is. This first product is supporting Latin Organics' mission to implement fully the organic way of farming within the Colombian territory so that illicit crops, as well as poverty, may be reduced.

Company Notes:

Mountain Meadow Honey is a small locally owned and operated apiary. Our honey is 100% pure, unfiltered, raw and harvested from fireweed in the Skeena Valley Area. Mountain Meadow Honey is never heated, filtered or pasteurized. Our process allows trace pollens, vitamins and active enzymes to be present. The area where the nectar is gathered is from isolated locations with high elevations of 4,000-6,000 feet. Free from any pollution or sprays makes this a truly unique honey. Considered by bee keepers as "the Champagne of Honey" fireweed honey is known for it's pale colour and delicate flavour. To be organic the rules require the location and bees to remain constant for 3 years. Obviously our hives have to be moved out of the mountains in the winter making the certification impossible. Because of our remote locations and standards we feel we do offer the best uncertified organic honey available starting in August of each year until supplies last.

Allergic to cows milk? Our sheep dairy products are a great tasting alternative.

Our sheep live outside all year round, guarded by livestock protection dogs. Animal welfare is a top priority on our certified organic farm. The Border Collies bring the flock from pasture to pasture and to the milking parlour.

Products Available:

Mountain Meadow Sheep Milk Brie - Year Round

Very creamy brie, mild when young but can get stronger with aging. I prefer it at about 4-5 weeks, usually right around the "best before" time.

Mountain Meadow Sheep Milk Yogurt - Year Round

Available as a plain yogurt, either whole or fat free. Sheep milk has double the amount of calcium compared to cows' or goat milk. Because of the rich milk, we do not need to add any sort of stabilizers to our non-homogenized milk.

Mountain Meadow Aged Sheep Milk Cheese - Year Round

For this type of cheese we apply the traditional methods of cheese making that my wife and I originally learned when we made cheese in the Swiss Alps in the early '80s. Our aged cheese grates and melts well.

Mountain Meadow (Sheep Milk) Oliva Feta - Year Round

This is our feta that we marinate in cold-pressed olive oil, curry, rosemary and garlic.

Mountain Meadow Sheep Milk Feta - Year Round

Well, feta should always be made from sheep milk. Sheep milk has a very mild delicate flavour. It is sweeter than cows' or goat milk, but very neutral. Better yet, try it yourself.

Mountain Meadow Sheep (Milk) Droppings - Year Round

A soft unripened cheese, comparable to chevre. The sheep milk again makes this one milder and creamier compared to the same cheeses made from cows' or goat milk.

Mountain Meadow Sheep Milk Butter - Summer

Unsalted and uncoloured. Available seasonally.

This is a very pure, tasty and unique sprouted bread made without flour, yeast, sugar or salt. The baking is done in a manner that retains the excellent nutrition. Cabernet Sauvignon Red Wine Vinegar - Year Round

Cabernet Sauvignon Red Wine vinegar made in the traditional Orleans method. Using high quality carbernet sauvignon grape juice we create the wine without any additives. The wine is then transferred to French Oak barrels where the wine is converted to vinegar over a 3 month period. The vinegar is further aged in oak for an additional 3 months then bottled into 200ml retail and 750ml food service bottles. Creating vinegar in the slow process of the Orleans method retains the flavour and body of the wine making a savoury vinegar that is delicious in dressings, marinades, reductions, and deglacing. No additives are used in the entire process.

The mountains around the Skeena Valley are blessed with the perfect growing conditions for fireweed. The hives that are set apart for fireweed honey production are moved up into the mountains and placed in the fireweed fields during the summer months. At the high elevation and isolation of being in the mountains, the bees are free to collect pollen away from pollution and pesticide sprays, making this a special honey. Because of its very light colour and subtle flavour it is considered the “Champagne of Honey” and as a result, highly prized. This honey is available starting in August and until supplies last.

Products Available:

Free range, heritage breed pork, all on the list of rare breeds of Canada. Our pigs are allowed to roam freely, socialize and engage in instinctive behavior such as rooting, wallowing and foraging. All breeding animals live in social groups; even the boars are together with the sows all the time. There is no teeth clipping, tail docking or ear marking. we leave our litters together to avoid stress and fighting. Our sows are not crated. Instead, they give birth naturally and raise their young without interference. All animals have free-choice access to outdoors at any time. Sunshine, fresh air, good feed and a stress-free environment eliminate the need for any medications. No animal by-products are used in our feed except for occasional milk and hard boiled eggs. We don't administer antibiotics routinely and don't use hormones or steroids at all. We grow everything on the farm that makes the difference in our pigs' diet and, with that, the quality of our pork. Our farm has no waste issues; manure is returned to the soil where it becomes fertilizer. Our pork is selected to have a high percentage of intramuscular fat, like a choice steak. You can expect a different texture of the meat, darker colour, more marbling and incomparable flavour compared to any conventionally-raised pork. Truly local, truly exceptional pork!

Company Notes:

Wineland Dressings was founded in 2000 by Peter and Valencia Young, when Peter, who was Executive Chef at Hillside Estate Winery in Penticton, was being constantly asked by restaurant clientele if they could buy the salad dressings served in the Barrel Room Bistro. Its location at a winery meant there was easy access to bottles, corks, labels, etc. There is also a tasting room and wine shop, a natural outlet for products. A small trial batch of Roast Garlic Balsamic Vinaigrette was produced and bottled, which very quickly sold out. Wineland Dressings was born, and we soon added the Raspberry and Black Pepper Vinaigrette. Our salad dressings are hand made in small batches from the finest available ingredients, locally-sourced where possible, and to the highest standards. All of our products are gluten free and contain no artificial thickeners, stabilizers or preservatives.

Products Available:

Roast Garlic Balsamic Vinaigrette - Year Round

The nutty mellowness of roasted garlic with the sharp acidity of Balsamic Vinegar make this a highly versatile dressing. Great on salads but also as a marinade for all sorts of meats, seafood and vegetables, as a party dip, or on pasta, rice or potatoes. Produced in small batches to my original recipe. Gluten free and suitable for diabetics. Available in 375ml bottles 12 to a case, or food service 4 litre jug.

Cilantro & Lime Vinaigrette - Year Round

A refreshing zingy vinaigrette for salads, an excellent marinade for chicken, seafood or pork and delightful with steamed fresh vegetables such as asparagus, green beans or carrots. Made with fresh locally grown Cilantro in small batches to my original recipe. Gluten Free and suitable for diabetics. Available in 375ml bottles 12 to a case or food service 4 litre jug.

Blueberry Vinaigrette - Year Round

The antioxidant properties of blueberries with lemon juice and white wine vinegar make this dressing a delight for summer salads of spinach or mesclun greens. Available in 375ml bottles 12 to a case or food service 4litre jug
